Summary

Full-stack software engineer with graduate-level research experience in HCI, ML, and accessible AI design. Background spans mobile/web development, UI/UX, and project management. Passionate about building accessible, user-centered technology.

Education

Doctor of Philosophy in Computer Science, University of Denver (DU) | GPA: 4.0 | Denver, CO Sep. 2025 – May 2026

- Chose to transition from doctoral research to industry and apply graduate-level research in real-world product development, with full support of my advisor.

Bachelor of Science in Computer Science, Metropolitan State University of Denver | GPA: 3.7 | Denver, CO Jan. 2022 – Dec. 2024

Professional Experience

Colorado Sustainability Hub | Denver, CO | Website: SustainabilityHub.co

Graduate Research Assistant, University of Denver

Sep. 2025 – May 2026

Undergraduate Research Assistant, MSU Denver

Sep. 2023 – Jun. 2024

- Contributing to NSF-funded Sustainability Hub, an interdisciplinary initiative advancing sustainable data access, visualization, and inclusive AI interaction design.
- Designing UI/UX systems, visual assets, and chatbot interaction models in Figma to boost public engagement and data understanding.
- Co-authoring a survey paper on LLM evaluation benchmarks and conducting independent research on accessible and inclusive LLM interfaces, focusing on improving usability across technical and non-technical users.
- Developed machine learning models to spot sustainability data patterns, collaborating with 10+ researchers in an Agile environment.

Full Stack Mobile App Development Intern & Project Lead, MSU Denver

Jun. 2024 – Jul. 2025

Denver, CO | Website: RoadrunnerConnect.co

- Led “Roadrunner Connect,” an interactive campus engagement app, using: Flutter (Dart) for the mobile app, MongoDB/NodeJS/ExpressJS for the back-end, and React (JavaScript, CSS) for the website.
- Proactively integrated Firebase for authentication (Google/iOS), Gravatar team profiles, and optimized API calls by indexing queries.
- Implemented event check-ins, photo and comment uploads, and a rewards system (badges, challenges, giveaways, leaderboards).
- Collaborated in an Agile team of 5 doing two-week sprints, managing task distribution and progress through ZenHub, doing daily standup ceremonies, tracking team OKRs, and using Git/GitHub for version control.
- Presented app updates to 15+ stakeholders, created Qualtrics surveys, independently represented the team in meetings, streamlined communications, and incorporated feedback for continuous improvement while deploying in app stores.

Learning Assistant (LA) — Discrete Structures & Computer Science 1, MSU Denver | Denver, CO

Jan. 2024 – Dec. 2024

- Tutored 60+ students in areas of CS and math. Conducted one-on-one tutoring sessions for over 20 students in Discrete Structures and Computer Science 1, addressing individual learning needs and increasing student exam scores by 12%.
- Held 10+ office hours weekly, providing guidance while reducing assignment-related issues and late submissions by 20%.

GameStop Assistant Store Leader (ASL), GameStop Inc. | Aurora/Denver, CO

Apr. 2023 – Jun. 2024

- Led store operations, including P&L management, scheduling, and loss prevention, while consistently ranking at the top of the district in sales performance and KPI metrics.

Awards, Certifications, & Studies

DU/MSU/UCD Hackathon 1st Place Award

Apr. 2025

- Co-developed “Lucent,” an AI-driven mental wellness app, winning 1st place. Used Flutter, FastAPI, Supabase (PostgreSQL), and GPT-4.1 for reflective chatbot interactions. Implemented an interactive bonsai tree for daily emotional reflection and user retention.

MLH DU/MSU Hackathon 2nd Place Award

Oct. 2023

- Co-created “SpiderByte,” a course-aligned coding challenge website, using Python, Flask, SQLAlchemy, HTML/CSS, PythonTutor, and CodeMirror during a 28+ hour hackathon, winning 2nd place among 6+ other teams.

Fundamentals of Deep Learning with NVIDIA, Certificate

Dec. 2023

SQL Competition Winner, Certificate

Apr. 2024

Deep Learning for Generating Educational Content, Independent Study

Aug. 2024 – Dec. 2024

- Fine-tuning pre-trained LLMs to generate customized quiz questions, aiming to improve model accuracy and student engagement.
- Collaborating in a team of 3, focused on AI-driven content creation, helping students learn through tailored follow-up questions.

Skills

Technical Skills: Java, Python, HTML, CSS, JavaScript, SQL, R, ARM Assembly, ExpressJS, Ruby, Flask, Flutter, React, Streamlit, Docker, Postman, Heroku, Swagger, MongoDB, Firebase Integration, Machine Learning, Deep Learning, TensorFlow/Keras

Design & UX: Figma, Accessibility (WCAG/a11y), Responsive Design, User Research, Inclusive Design, User-Centered Design

Soft Skills & Project Management: Git/GitHub, ZenHub, Agile Methodologies, Google Workspace, Microsoft Office Suite, Curiosity, Metacognition, Communication, Problem Solving, Innovative, Adaptability, Leadership, and Effective Time Management
